Implementations

macConnector

The macCONNECTOR's gives users an alternative to custom development projects that have long implementation times and and cost significant amounts. The macCONNECTOR's flexible configuration settings allow its powerful engine to keep two platforms in constant sync.

Product Features

- ✓ Easily connects your Acumatica ERP with Magento;
- ✓ Comes with pre-programmed web store based on Magento Community Edition;
- ✓ Standard Carriers Magento integration;
- ✓ Standard Payments Magento integration;
- ✓ Video lessons showing you how to properly setup your new eCommerce platform and macCONNECTOR link;
- ✓ Custom Magento module that allows you to adjust main element colours;
- ✓ Optional: integration with marketplaces(Ebay, Amazon, Rakuten, Walmart, Newegg).

bluCURRENT.io

Magento Installation

macCONNECTOR comes with pre-programmed web store templates. Pick one of our designed, coded, and tested Magento templates and deploy your new web store complete with the live link to your ERP in less than 24 hours. We have pre-defined virtual machines ready to go on Amazon AWS Servers or on Microsoft Azure. You can get the full ownership of the store, and you can choose to have us maintain it for you going forward or take care of that yourself.

Your new web-store can be deployed in the most common web services as well as on your server.

- ✓ Pre-installed Microsoft Azure instance;
- ✓ Pre-Installed Amazon Web Services instance;
- ✓ Client's own server (deployment may take more than 24 hours).

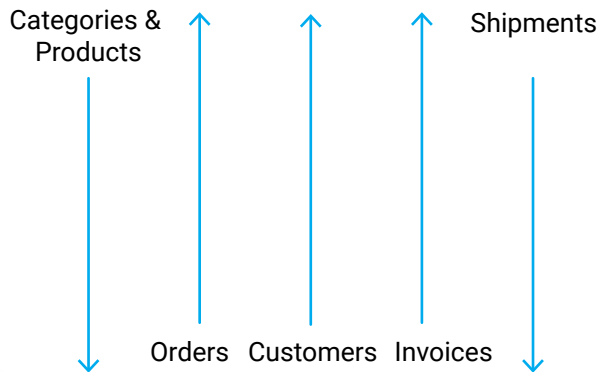

macCONNECTOR

Connector comes in two editions: Standard and Advanced Editions. These are well-aligned with Acumatica Editions, and can be used interchangeably with any edition of Acumatica.

The developers at BluCurrent have designed the macConnector to work primarily with Acumatica's Small Business and Advanced editions.

Standard Edition
